

iSave – The Best Accounting Software

This is a business management and accounting program specifically designed for mid-sized companies. In this product you will find a wealth of features normally found in mid-sized software programs, yet at a very reasonable price.

Along with Standard features, it includes: Backorder Management, Stock Replenishment, Inventory Assemblies, and Business Analysis. The software is designed for those businessmen, who need a higher level of functionality to handle the day to day operations of running a business. This edition makes it possible for your mid-level business to grow by providing you with better access to time critical information.
